

DT-44

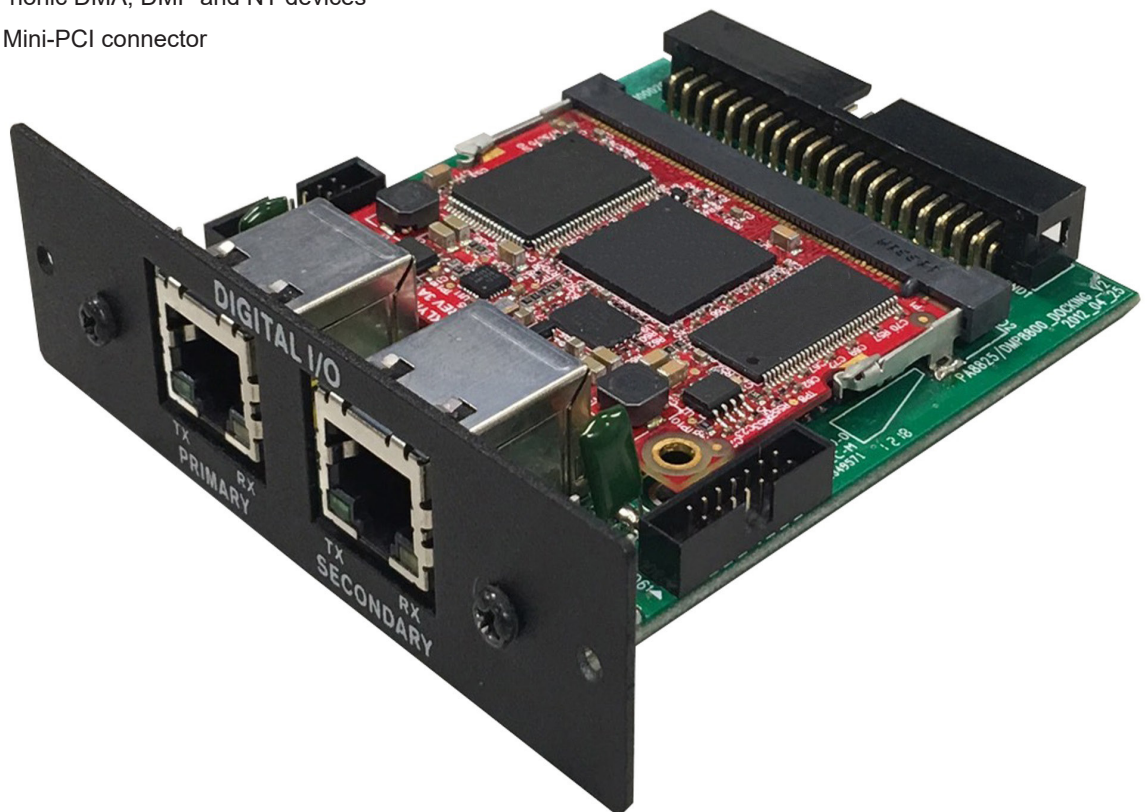

4x4 Dante Expansion Card

DT-88

8x8 Dante Expansion Card

Features

- ▶ 4 x 4 or 8 x 8 audio streaming
- ▶ Connect via CAT5/6 cables
- ▶ Features dual RJ-45 connectors (“Primary” and “Secondary”)
- ▶ Buffering up to 2000 samples per channel
- ▶ Compatible with select Phonic DMA, DMP and NT devices
- ▶ Connects to system via Mini-PCI connector

Overview

Phonic DT Series Dante Digital Networking Card is uniquely and exclusively engineered and developed for all Phonic' Dante-enabled models, offering the perfect digital audio and integrated control data distribution over your existing Ethernet networking without possible signal degradation due to electromagnetic interference, high-frequency attenuation, voltage drop and taxing wire routing that conventional analogue wiring/networking suffers. 4-in/4-out (DT44) and 8-in/8-out (DT88) models are available, requirements from every segment of the audio industry are satisfied.

Specifications

	DT-44	DT-88
Channel Count	4-in/4-out	8-in/8-out
Sampling Frequency	44.1kHz and 48kHz	
Network	2 x Gigabit (1000Mbps; 1Gbps) via Ethernet RJ45 connectors	
Applicability	All Phonic Dante-enabled models	
Compatibility	DMA8413, NT2504	DMP8800, DMA8825,

Installation
