

JUBI 12A JNR

12" Active Loudspeaker

JUBI 15A JNR

15" Active Loudspeaker

Features

- ▶ Remarkable sound, remarkable power, and remarkable style in a lightweight, compact enclosure
- ▶ 320 Watts of continuous power using Class D technology
- ▶ 123 dB maximum sound pressure level
- ▶ 12" or 15" woofer matched with compression tweeter
- ▶ Flat frequency response between 53/56Hz and 20kHz
- ▶ 2 channel onboard mixer: mic channel featuring an XLR and 1/4" TRS phone jack, and line channel with 1/4" TRS and stereo RCA inputs
- ▶ Send speaker's main signal off to additional speakers or amplifiers through a balanced 1/4" TRS output connector
- ▶ 4th order phase-accurate Linkwitz-Riley crossover
- ▶ Impact resistant polymer enclosure with internal bracings
- ▶ Tour grade steel grille (1.2 mm)
- ▶ Rotary EQ controls for high and low frequencies

Overview

Phonic's Jubi 12A JNR and Jubi 15A JNR establish a new paradigm for molded powered speakers. Jubi's 320 Watt (continuous) amplifier uses Class D technology to produce a shattering 123 dB maximum SPL, providing enough power for a wide range of venue types and sizes. A lightweight design and rugged pole mounts make the Jubi JNR the most versatile, portable active loudspeaker today. Phonic engineers designed a high BL force factor woofer and a compression tweeter to achieve the Jubi JNR's astonishingly wide sound stage and a vivid, transparent signature sound. A carefully crafted polymer enclosure with stunning vertical curvatures not only look great, but also improve acoustic accuracy by minimizing internal diffraction. Finally, reliability and durability were the paramount factor throughout the Jubi JNR's development. With 320 Watts of ground shaking power, a 2-channel on-board mixer, custom engineered transducers, and incredible versatility, the Phonic Jubi 12A JNR and Jubi 15A JNR are loudspeakers to be reckoned with.

Woofers and Tweeters Engineered Right

Unlike many other speaker manufacturers that use pre-assembled OEM woofers and tweeters, Jubi JNR transducers are designed from scratch, in-house, by Phonic. Everything, from the cone pulp formula and the curvature of the tweeter's titanium membrane to the characteristic of the magnetic field, is uniquely Phonic, uniquely Jubi. Jubi JNR's state-of-the-art 12" and 15" woofers have a distinctly high BL force factor and a long-throw extension which produce marvelously deep and defined bass traditionally unattainable in small enclosures. The compression tweeter complete the Jubi JNR's vivid, transparent sound signature.

Advanced Electronics. Advanced Reliability

With over 35 years of experience, Phonic has few equals when it comes to advanced electrical engineering technology. With the Jubi JNR series, this cumulated expertise is on display. Core features include:

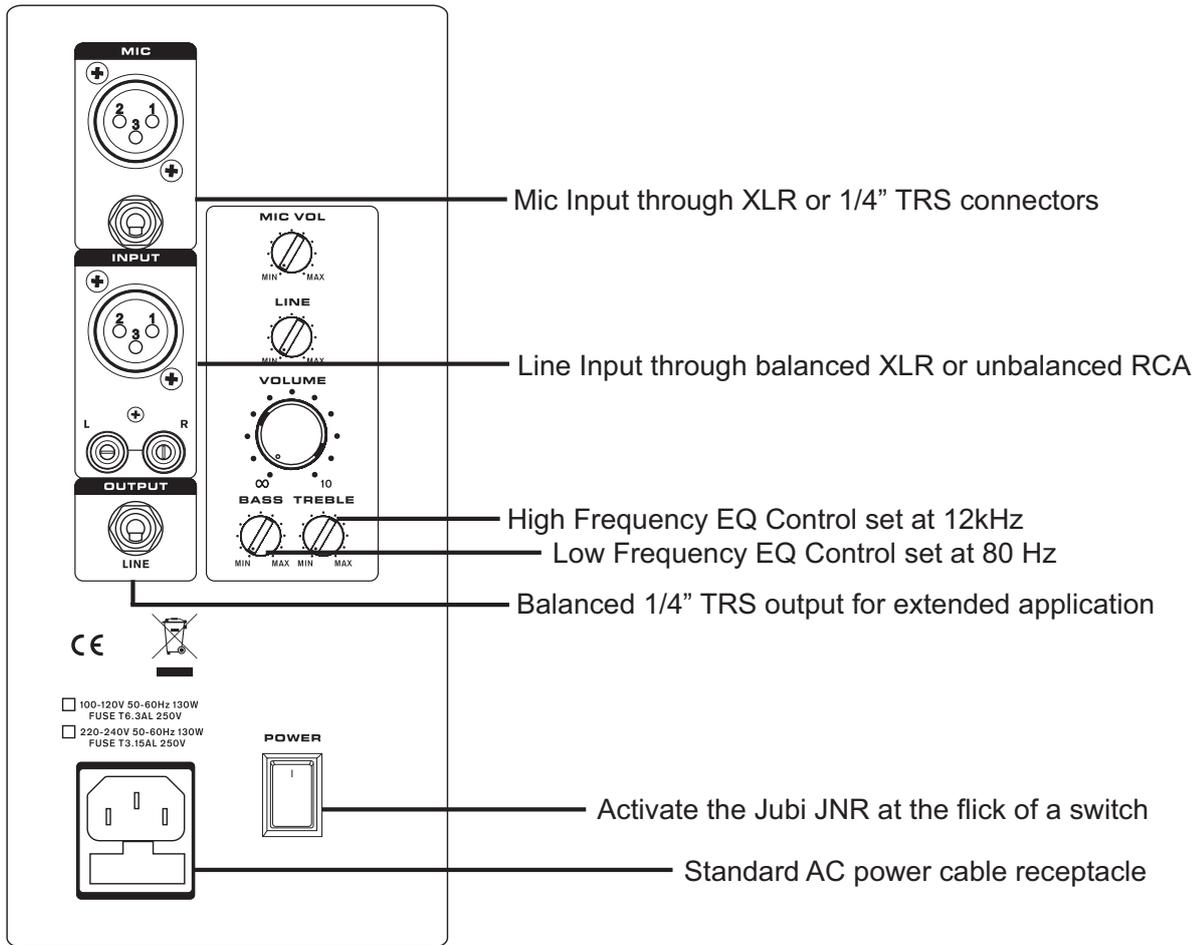

- ▶ Time alignment and phase correction: In listening tests, many notice that the Jubi JNR seems more "real" or more "live" than other speakers. This is because Phonic's active electronics ensure that sounds from the Jubi JNR hit listeners' ears at the precise moments the original recording intended.
- ▶ High Dampening Factor and Woofer Stabilization: The Jubi JNR has a high amplifier dampening factor to ensure that the woofer reaches optimal excursion. Additionally, Phonic engineers added circuitry to manage the speaker's electrical feedback, in effect, stabilizing woofer movement. The high amplifier dampening factor and stabilization circuitry give the Jubi JNR its spectacular bass depth and clarity.
- ▶ Transducer Protection: Active electronics oversee tweeter and woofer excursion, preventing audio artifacts, distortion, and speaker damage.

With experience and technology comes excellent performance and reliability. But you can never be too careful. As of the launch date, the Jubi JNR has logged more than 1000 hours of real world and lab tests, guaranteeing a remarkable level of reliability. From heated ovens, freezing subzero rooms, high humidity chambers, to electrical voltage spikes, the Jubi JNR has endured it all.

JUBI JNR SERIES
